Bachelor of System Analysis and Data Science

Profile

Motivated and fast-learning junior full stack developer with a strong foundation in Vue, and Node.js. Currently seeking an opportunity to join a team where I can grow professionally and contribute to real-world projects.

Tech Skills

Frontend: Vue.js,React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Pinia (basic), Context API, Vue Router, Axios, Responsive Design

Backend: Node.js, NestJS (basic), Express.js, REST API, PostgreSQL, MongoDB, JWT, GitHub Actions (basic)

Experience

Frontend Developer (Freelance) | 2024 – 2025
- Built a commercial website for a retirement house (Vue.js, Tailwind, Node.js).
- Built simple QR-code menu website for a caffee
- Implemented interactive pricing calculator, inquiry forms, and SEO-friendly responsive design.

Frontend & Backend Developer (Freelance) | 2025
- Developed core frontend for a custom CRM (Vue.js, Tailwind) and contributed backend features (Node.js, PostgreSQL).
- Delivered client/lead management UI, API endpoints, and role-based authentication.

Selected Projects

E-commerce Web Application (Personal Project) | 2024
Tech stack: Vue.js, Pinia, Bootstrap, Node.js, PostgreSQL
- Built a full-featured online store with product catalog, shopping cart, and checkout flow.
- Implemented JWT authentication with role-based access control (admin/user).
